

Ziptrak® Interior

A revolutionary advance for Interior Blinds

www.ziptrak.com.au

Designed to enhance your indoor comfort and style.

NO CORDS
OR CHAINS –
CHILD-SAFE.

Ziptrak® Interior blinds provide superior insulation and sun protection.*

If you are seeking light blocking for a home theatre, bedroom, or conference facility, the Ziptrak® Interior system is the perfect choice. Since the fabric sits within the side track, there are no light gaps present at either side of the blind, unlike most types of roller blinds.

Superior insulation.*

Leave at any height.

Fingertip control.

Total blackout.*

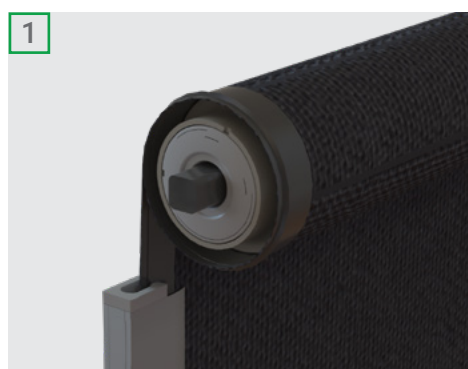

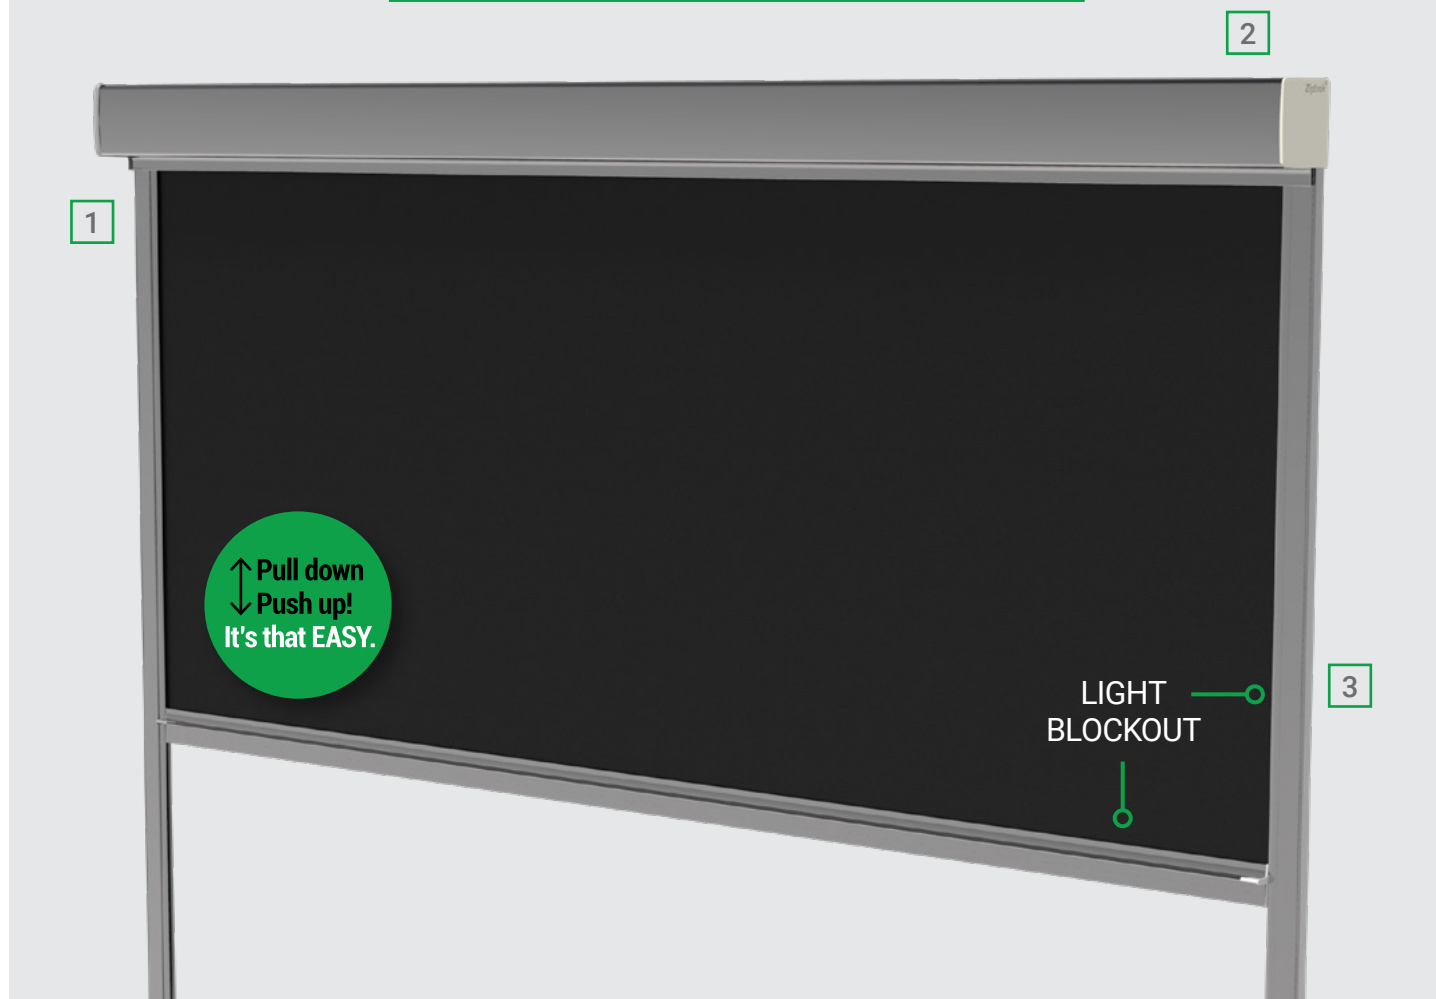

Robust and durable.

*Features depend on the type of fabric selected.

Advanced light control

SMOOTH OPERATION

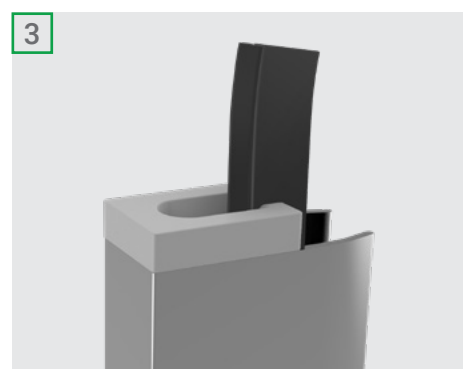

Ziptrak® Spring-Balanced technology permits effortless smooth operation. Simply push the blind up or pull the blind down and your Ziptrak® blind will stay where you leave it. Easy to use and child safe.

Optional motorisation is available for one-touch convenience.

STYLISH PELMET

The aluminium pelmet offers stylish and robust protection to the blind, along with superior insulation and light blocking capabilities. The slim and discreet system blends easily with your home décor.

LIGHT BLOCKOUT

Our innovative Track-Guided Blind System slots the fabric inside the discreet side tracks. Blocking light and creating a sealed space between the glass and blind; minimising air transfer to help you keep the space cooler in summer and warmer in winter.

There are many brands and types of interior fabrics available that can be paired with the Ziptrak® Interior Blind System. The fabric selected is essential and will determine how well blinds meet your needs. Please speak with your Retailer for expert advice on choosing a fabric to suit your requirements. Retailers have display blinds and fabric swatches that you can view and select what type of fabric will work best for your are.

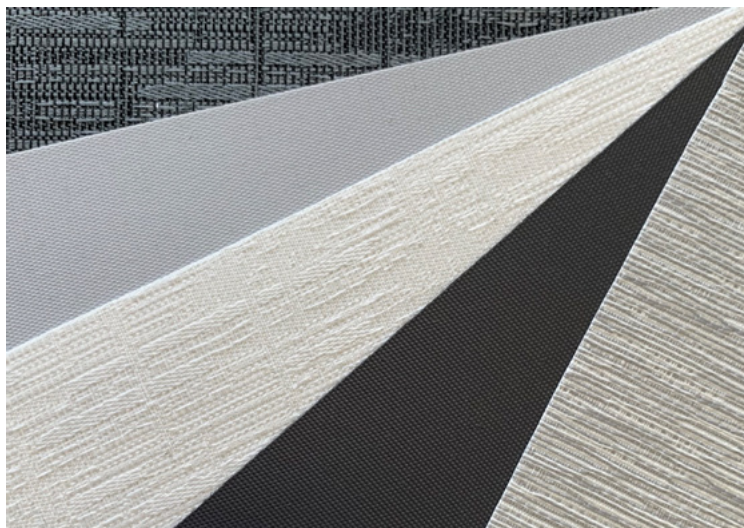

Fabric options

There are many brands and types of interior fabrics available on the market that can be paired with the Ziptrak® Interior Blind System. These include light filtering and blackout fabrics.

Interior screen or mesh fabrics can provide uninterrupted daytime views. Translucent fabrics allow brightness and privacy during the day, and blackout fabrics are the ideal solution for privacy and light-control.

Retailers have display blinds and fabric swatches available for you to view. You can select the type of fabric that meets your personalised needs and budget.

*The interior fabrics are complementary of the Ziptrak® system but are not manufactured by Ziptrak Pty Ltd. For more information about specific fabric properties and features, please speak with the fabric manufacturer.

Ziptrak® Interior is perfect for:
